SUMMARY

Enthusiastic and detail-oriented third-year B.Tech Computer Science Engineering student with a strong foundation in programming, data structures, and algorithms. Passionate about software development, problem-solving, and studying new technologies. A quick learner with excellent analytical skills and a team-oriented mindset, eager to contribute to innovative projects in a dynamic tech environment.

PROJECTS

Student Online Learning Platform

Designed an online learning platform with course creation, multimedia integration, quizzes, and certification. Managed student enrollments, progress tracking, and course analytics to enhance interactive and structured learning for educational institutions, corporate training, and individual instructors.

Rock Paper Scissor Game

Created a Rock-Paper-Scissors web game where users select an option, and the computer randomly generates a choice. The game displays the result (win/loss) instantly.

Math Quiz Application

Developed a GUI-based interactive Math Quiz using Tkinter, enabling users to practice basic arithmetic operations. Implemented random problem generation, user response evaluation, and score tracking for an engaging learning experience.
